Projects

- **Yugam'17 (KCT TechFest)**
  Project Guide – Raja sudhan, Software Developer, Voonik, Bangalore.
  A Web application and Api for android app for the kct techfest which will be used around minimum of 25,000 unique users.
  Website Features:
  1. Dynamic website with payment integration and Marketing tools such as mass email and SMS communication.
  2. Separate portal for offline payment collection, which allows for revenue collection.
  3. Separate portal for individual event registrations, which means no paper will be used.
  4. Full CMS system for Yugam organizers and control over the content as according to their position and responsibility.
  5. Automatic e-certificate generation.

- **KCT SMART TRANSPORT:**
  Project Guide – Sathish Kumar, Cyber security Expert, Technical Lead – iQube.
  Aims to build a vehicle tracking system for 2000 KCTians. Web application for transport admin to track the individual student in and out, real time vehicle tracking (40 buses), bus ignitions, over speed analysis etc. For students an android app to know their bus location and alerts when his/her bus reaches nearby his/her stop.

- **KCT FACEBOOK MESSENGER BOT:**
  A common platform for all kctians to get connected. The bot makes getting marks, attendance percentage and knowing the events around the college Easier (not deployed but learned a lot).

- **TELEGRAM BOT:**
  A self-customized telegram bot to make myself more comfortable and ease my day to day Activities. For more details about the code and features here I have attached my GitHub Repo page. https://github.com/Ajithkumarsekar/Telegram-Bot.

HOBBIES AND INTERESTS

- **Scripting**: Like to automate everything that is repeatable in my day to day activities. Have written many scripts such as integrating my college pdf calendar with my google calendar, downloading images of all kctians, customized telegram bot etc.

- Love to explore new technologies and new programing languages. Have done many small projects.
  GITHUB PROFILE: Ajithkumarsekar (all classified projects at Bitbucket).

- Reading blogs and answers in Quora, Watching Ted and Programming Talks, Documentaries, YouTube and Movies. Reading Tech news and blogs.

Positions of Responsibility

- Fellow Member at **iQube** (Innovation center at KCT) and **Code Community**.
- Handled '**Web Technology**' classes for 15 first year students at iQube.
- Class Representative for past two years.
- Yugam 2016 '**Machine Learning**' workshop organizer.

Achievements and Awards

- Runner up of '**YuStart 17**' a national level Startup pitch competition conducted by **YI** and **CII.**
- **TESLA** (For best Innovation) Award winner for year 2016-17 on KCT Founders day.
- Got **Mahatma Gandhian** Scholarship for three years consecutively for academic performance.
